

# Arctignor Industry

Your local supplier of steel and aluminium products

The team at Arctignor Industry have years of experience with steel and aluminium manufacturing. We wish to use our teams combined knowledge to assist in your projects and deliver an optimal and efficient solution

# PRODUCT CATEGORIES

<b>Vessels and tanks</b>	<b>P. 1</b>
Storage tanks and pressure vessels	
Pipe supports and pipe racks	
<b>Utility systems</b>	<b>P. 2</b>
Cooling systems	
Heating systems	
Water treatment systems	
Arctic Cleaning	
<b>HVAC</b>	<b>P. 3</b>
Dampers and louvers	
Humidifiers and de-humidifiers	
<b>Hydraulics</b>	<b>P. 4</b>
Hydraulic power units	
Accumulator skids	
Hydraulic valve skids / cabinets	
<b>Pre-fabricated structures</b>	<b>P. 5</b>
Modular buildings and containerised systems	
Rails and skidding systems	
Switchyard structures	
<b>Process equipment</b>	<b>P. 6</b>

# VESSELS AND TANKS

## Storage tanks and pressure vessels

We can design and manufacture tanks and vessels in various shapes and sizes. We can build tanks up to Ø3m in-house, and larger tanks on-site.

## Pipe support and pipe racks

We can plan, design and manufacture pipe supports and pipe racks for your plant. We deliver prefabricated details according to your requirements and can also provide on-site installation services.

# UTILITY SYSTEMS

## Cooling systems

We deliver turn-key cooling systems for your plant. We have experience with cooling of rectifiers, transformers and room cooling for electrical plants.

## Heating systems

Complete piping systems for distribution of heat using metallic and non-metallic piping with or without control systems

## Water treatment systems

We can deliver de-ionized water systems, fresh water generators, filtration systems, UV-sterilisation systems and chemical dosing systems.

## Arctic Cleaning

Cleaning skid for de-scaling and maintenance of heat-exchangers and cooling systems.

# HVAC

## Dampers and louvers

We can produce a variety of square and circular dampers for HVAC systems both offshore and onshore.

- Fire- and gas dampers
- Balancing dampers
- Non-return dampers
- Control dampers
- Weather louvers and mesh

As an option, our dampers can be delivered with electrical or pneumatic actuators.

## Humidifiers and de-humidifiers

We can deliver maintenance free humidification systems for any application. Our humidifiers can be used in areas where moisture level control is critical, such as in hospitals, libraries, laboratories, museums, electronic equipment and others.

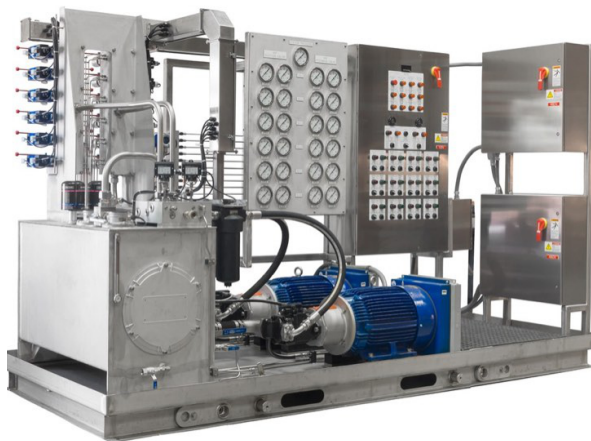

We can also deliver systems for de-humidification.

# HYDRAULICS

We can design and manufacture the following hydraulic systems for land based industry, marine and offshore:

- Hydraulic Power Units (HPU's)
- Accumulator skids
- Hydraulic valve skids / cabinets
- Instrumentation and controls for the above mentioned systems
- Factory Acceptance Test (FAT), site installation and test

# PRE-FABRICATED STRUCTURES

## Modular buildings and containerised systems

We can plan, design and deliver tailor-made modular building and containerised systems such as control rooms, electrical rooms, power systems, laboratory & test facilities, accomodation and others.

## Rails and skidding systems

We manufacture and deliver rails and skidding systems for transformers, rectifiers and other heavy equipment.

## Switchyard structures

We can manufacture equipment supports, steel frames and structures, as well as other equipment like access ladders and mounting brackets.

# PROCESS EQUIPMENT

- Pump skids
- Tank skids
- Mixing skids
- Transport skids
- Valve skids
- Chemical injection skids
- Transport screws
- Air compressors
